

Product Overview

50 way voice patch panels are in 1U high density format for greater voice integration than traditional patch panels. Designed to be utilised with any voice combination, of up to three pairs.

Features & Benefits

- Constructed from mild steel with a black finish
- 6 vertical IDC connectors per RJ45
- 110/LSA compatible IDC connectors
- Perforated cable strain relief for multi-pair cables
- 5 x 10 way circuit boards for modularity
- Earth bonding kit supplied
- 19 rack mountable including fixing kit

Additional Information

The 50 way voice integration patch panel has six IDC connectors to every 8 way RJ45 socket, this ensures that analogue, digital and ISDN voice systems will have easy migration into structured cabling. This patch panel is ideally suited within the horizontal or backbone cable distribution planes. The perforated cable management system is ideally suited to support the weight of larger multi-paired cables.
